1. Do you have any prior experience with Data Preparation pipelines?

● Yes 19  
● No 1

2. The text in the image is an example of a Data Profiling report generated by an LLM.

Indicate **your agreement with the statements below**.

● Strongly disagree ● Disagree ● Neutral ● Agree ● Strongly agree

The text should include all relevant information.

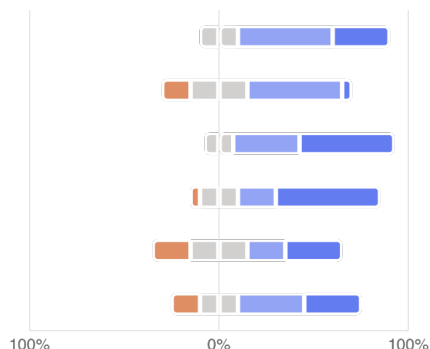

The information in the text helps me understand all the data profiling characteristics of the dataset.

All mentioned information should be correct.

The text should not contain any errors.

The information should be provided in a directly usable form.

The information in the text should help me complete the task on my own rather than giving me the final solution.

3. The text in the image is an example, generated by an LLM, of a suggestion for imputing a dataset.

Indicate **your agreement with the statements below**.

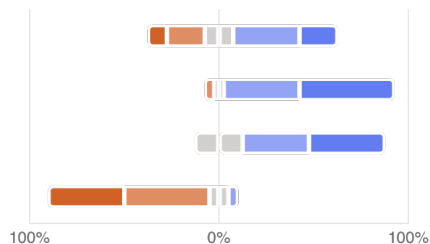

● Strongly disagree ● Disagree ● Neutral ● Agree ● Strongly agree

It is important that the text provides me with one clear strategy to solve the task.

I want to have the freedom to choose among multiple strategies to solve the task.

I want to have a different solution for each column rather than a unique solution for the whole dataset.

I prefer a short, unique solution for the whole dataset instead of a longer solution that addresses each column separately.

4. Consider the three pieces of text in the image, each discussing missing values in a dataset.

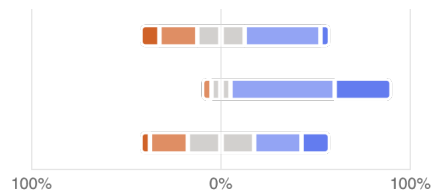

For each text, say how satisfied you are with the support it offers you to complete the task.

● Very dissatisfied ● Somewhat dissatisfied ● Neither satisfied nor dissatisfied ● Somewhat satisfied ● Very satisfied

Text A (text with description)

Text B (text with data)

Text C (code)

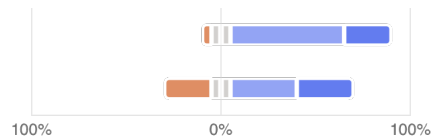

5. Consider the two pieces of text in the image discussing how to standardize a dataset.

**For each text, say how satisfied you are with the support it offers you to complete the task.**

● Very dissatisfied ● Somewhat dissatisfied ● Neither satisfied nor dissatisfied ● Somewhat satisfied ● Very satisfied

Text A (single strategy)

Text B (multiple strategies)

6. Consider the three pieces of text in the image discussing imputation of missing values in a dataset.

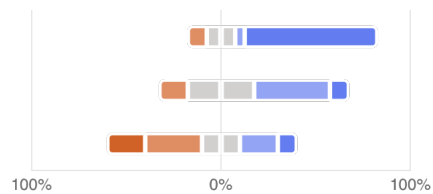

**For each text, say how satisfied you are with the support it offers you to complete the task.**

● Very dissatisfied ● Somewhat dissatisfied ● Neither satisfied nor dissatisfied ● Somewhat satisfied ● Very satisfied

Text A (column-oriented approach)

Text B (aggregated approach)

Text C (table-wise approach)

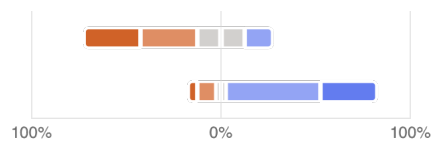

7. Consider the two pieces of text in the image discussing dataset duplicates.

**For each text, say how satisfied you are with the support it offers you to complete the task.**

● Very dissatisfied ● Somewhat dissatisfied ● Neither satisfied nor dissatisfied ● Somewhat satisfied ● Very satisfied

Text A (deduplicated dataset)

Text B (duplicate rows)

8. If you have noticed something that you find relevant but hasn't been mentioned anywhere in the questionnaire, please write it here. We highly appreciate it!
